

Single 600馬力 HP

見事シリーズチャンピオン獲得!!
2010年 JAF全日本ジムカーナ選手権
サポートドライバー: 新井大輔

Unprecedented torque delivery
ATS Prospec II single covers 600 HP with
the pedal effort lighter than stock

ProSpec II -2,400

With the introduction of a higher leverage pressure plate and a new reinforced cover, the clamping rate has been raised to 2,400kg. The light pedal effort and the excellent carbon clutch characteristics are intact.

"Pro-spec2"

ATS & ACROSS CARBON SINGLE CLUTCH

Available with
1,600 & 2,400
Clamping force

No slippage at cold temp
When the engine is warmed up,
even at the cold temperature,
ATS carbon clutch does not slip

Light inertia

The ultra light structure reduces the moment of inertia which enhances the every movement of your vehicle

Crisp engagement

The return springs on the cover constantly pull the pressure plate and generates the stable and crisp gear change

Nimble shift

The carbon disc weighs only 200g which enhances the synchronization and make the nimble and sharp shifting possible.

Soft engagement

The carbon clutch engages much softer than metal clutch and makes half clutch operation easier

ATS & ACROSS

Spec II 2,400 is available for all the previous Spec I models except for Honda FF and Porsche

Ultra light pedal effort

The pedal effort lighter than stock provide very comfortable driving. It is 20% lighter than previous 1,300kg

Spec II Carbon Twin / Carbon Triple

Spec II twin / triple provides higher clamping force than the previous models with the lighter than stock pedal effort. Please refer to our website for detail

Verified at the actual street and race track driving

The rated 600 HP is not the mere calculated number. The Prospec II 2400 has been tested extensively by ATS Supra (600 HP / 70kgm) on the street as well as the race tracks
