Note

* if the car is equipped with a stock viscous LSD, the ring gear has to be replaced with the one used for an open differential. For a detail informatoin, please refer to ATS.

#1: Speedometer drive gear is carved on the differential case. A speedometer driven gear is included (not for FD2 LSD).

#3: Depending on the model, year, and the stock differential, Honda has 3 kinds of side bearings and 2 kinds of spacers. Make sure to use the one equipped with your car.

#5: New for 2012. The number of the internal disc is 24. For DC2 & EK9, the sidebearing for DC5 is required.

#6: A replacement for the Matsui Special LSD. 1 way cam, choice of 45, 55, 70 degree. The default setting is 70.

#7: Newly designed chromoly differential case

#9: Bearing for DC5 is required. 91005-PPS-003

#21: 1 way cam with the three (45, 55, 70 degree) angles
